

MEZZ SOLUTIONS

PRODUCTIZING YOUR IDEAS!

2026 February

WHO ARE WE?

We help small to medium size enterprises, entrepreneurs, start-ups to design, develop and manufacture their electronic products while managing the supply chain to ensure the product gets to the market in time with top notch quality.

Established in 2018, in Shenzhen, China.

We're a squad of experts in

- Product design,
- Electronics and hardware development,
- Firmware, software
- Mobile app and cloud development,
- Manufacturing in China, Taiwan, Vietnam, Thailand and Turkey
- Supply chain management,
- Quality management,
- Sourcing.

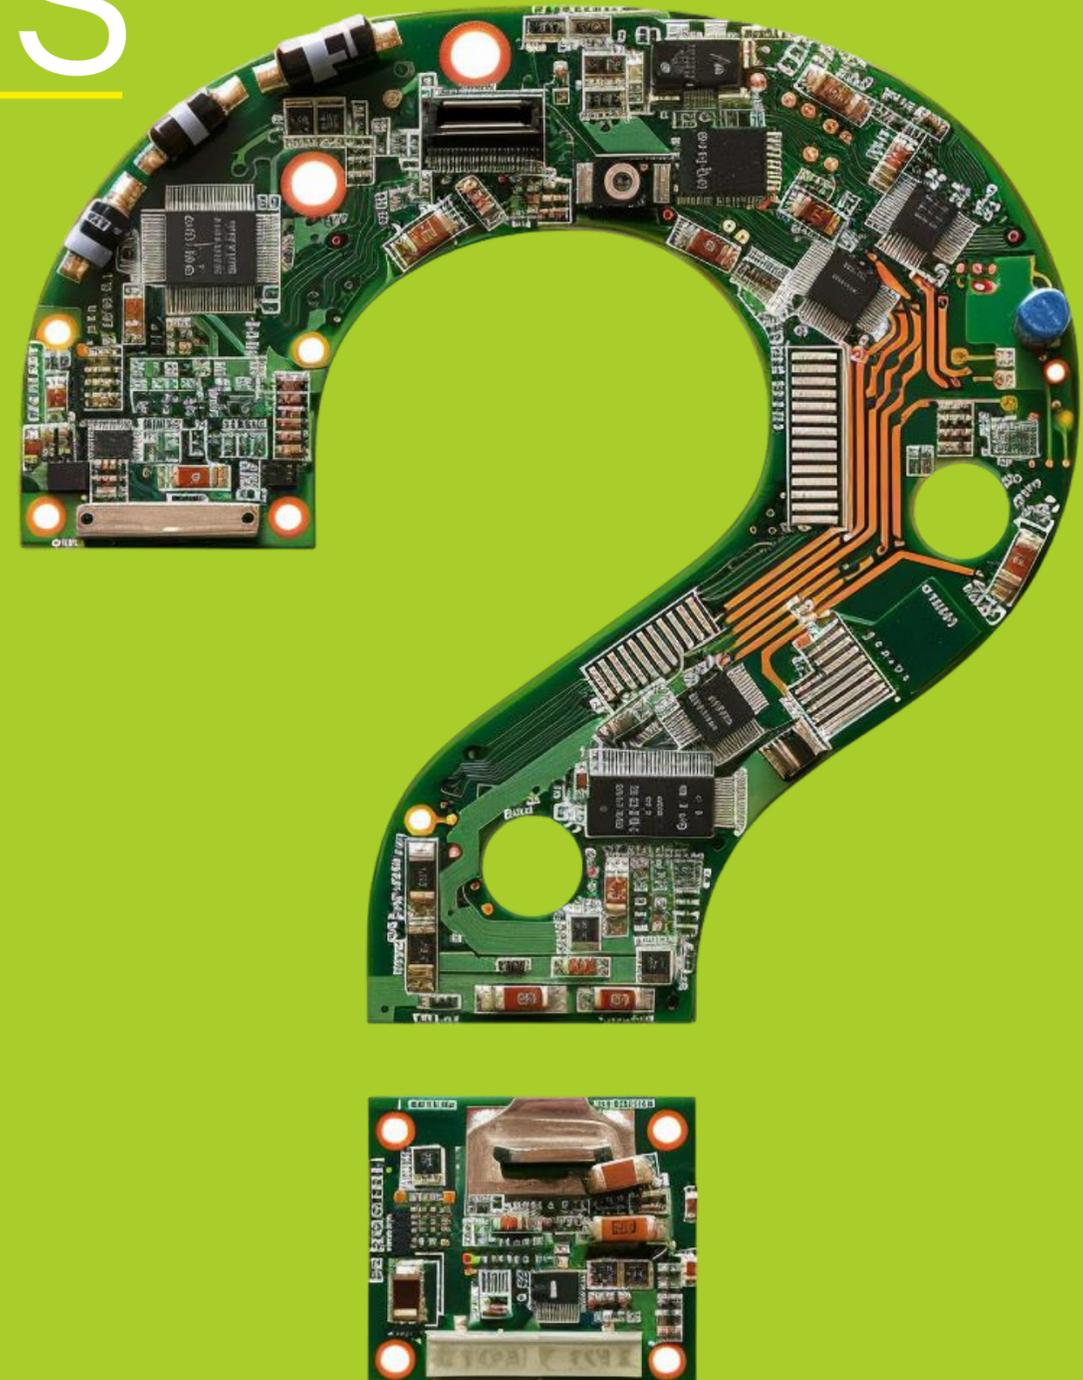

WHY US

Common failures when startups work with manufacturers directly:

- Wrong supplier choice
- Hard-to-manufacture designs
- Lack of experience
- Wrong projection of time and cost
- Last-minute notice from manufacturers about problems
- Geographically being too far from suppliers
- Other technical problems
- Language and culture barrier in communication

What can Mezz Solutions provide to you?

- Turning your idea into a mass product
- 20 years of experience (15+ years in China)
- Realistic timeline and cost projections
- On-track development
- Efficient communication, we understand both sides
- Easy to manufacture designs
- Pro-active approach to solving problems ahead
- Based in China

SERVICES

Electronics Design	Schematic design, PCB design, PCBA assembly and prototyping, feasibility analysis and BOM
Software Development	Embedded software development, cloud/back-end development, IOS/Android app development, UI/UX design, AI
Industrial Design	We follow customers' briefs and start with industrial design, then produce a visual prototype.
Mechanical Design	Upon design confirmation, we initiate mechanical design, followed by vendor review and feedback integration for optimal manufacturability.
Supply Chain Management	Factory scouting and on-site meetings, Samples arrangement and testing, contract management, communication & negotiation.
Manufacturing	We can do our plastic injections in-house. For small quantity manufacturing, we use our own workshop. For bigger quantities and more complex projects, we use our partner contract manufacturers.
Quality Management	Factory audits, product inspections
Test & Certification	Functional and performance tests, safety and reliability tests, certifications.
Total Project Management	From the design to the manufacturing stage, we manage the whole project for you. Maximum 5 projects/year – concentrated on each. Charged by monthly management fees.
Sourcing	We can source components, semi-finished and finished products, machinery
